Business & Tourism

As part of our Business school, our students undertake an internship project to gain work experience and undertake research projects on an issue or topic that a host organization would like them to research. The research and recommendations benefit the host organizations.

Within the Bachelor of Applied Management, students have access to:

- Sexy Summer Jobs leading to Apprenticeships
- PEAC - Advisory committee for courses
- Industry contacts lecturers have gathered
- Ex-Students

Our students solve real business problems for real clients in innovative and creative ways, harnessing the latest technological advancements.

In their third year of study, Bachelor of Information Technology and Bachelor of Applied Management students work on industry projects, combining their skills to demonstrate competence, creativity, commitment and craftsmanship.

Information Technology

Our BIT students have research skills, problem solving and analytical skills, as well as many other specific skills relating to different majors, ranging from professional conduct practices to technical consultancy.

The BIT graduates offer:

- A vested, personal interest in giving back to the industry
- An eagerness to teach what they have learned to give those coming after them a better experience.
- Experience and high qualifications in web design, software engineering, and project management.
